

DANIEL SHERER

VICE PRESIDENT AND CHIEF TECHNOLOGY OFFICER

LEADERSHIP BIO

BACKGROUND

Daniel has over 30 years of experience in the information technology field, including 18 years delivering analytical systems for US-based health insurance companies.

In Daniel's prior role as Associate Vice President in MedeAnalytics' consulting services team, he led multiple virtual teams involving product standardization, consulting and solution delivery to identify opportunities to improve care and efficiency. He also supported the MedeAnalytics' payer business team and provided leadership and technical oversight for all payer clients.

Before joining MedeAnalytics in 2010, Daniel was the Data Warehouse Manager for Analytics and Reporting at Health Net, Inc. He also previously worked as a Senior Engineer in the Executive Information Systems for Wellpoint.

Daniel received training in Information Systems from the United States Air Force and was the top graduate in his NCO Leadership class. Throughout both his military and civilian career he has continued both formal and situational training.
